

Lean Canvas

#### Problems - Difficulty in identifying and reaching decision-makers at target organizations - Inaccurate or incomplete contact information - Labor-intensive and time-consuming lead generation process - Limited ability to analyze and augment lead data with actionable insights		#### Solution - Continuous data scraping from multiple sources - Validation of contact information using third-party tools - Seamless ingestion into a LightRAG system for efficient retrieval - AI/ML-powered data augmentation for enriched lead profiles - React.js + Next.js based CRM interface for lead management		#### Unique Value Propositions - Automated, accurate, and continuous identification of decision-makers - High-quality, validated contact information - Enriched lead profiles with actionable insights - Easy-to-use CRM for managing and querying leads
#### Key Metrics - Number of valid leads generated per week - Accuracy rate of contact information - Frequency of CRM usage and RAG queries - Percentage of leads converted into customers		#### Channels - Email campaigns - Social media marketing - Partnerships with industry associations - Direct outreach via LinkedIn		
#### Cost Structure - Development and maintenance of lead generation agent - Subscription fees for third-party validation tools - Cloud hosting and storage costs (AWS, GCP, or Azure) - AI/ML model integration				

and operation costs
